

Today, we have ended redesigning website for the **Foundation for Children** with Cancer In CMS system [www.fundacja.net](http://www.fundacja.net).

Main goal of the Foundation is to provide overall help for children with cancer and their families.

The foundation fights for their right to lead a normal life with social acceptance. All activities are aimed at diminishing their pain. The foundation takes care for them so that the illness does not take all happiness away and so that they can lead their life close to the normal one and they can get back to society and fulfill their dreams after the cancer trauma. The foundation prepares many programs that are aimed at help, still developing new methods having ambitious plans for the future.

**Technologies used:** PHP, MySQL, HTML, CSS
